

Environmental Policy

Williams Refrigeration, a leading manufacturer of commercial refrigeration equipment, endeavours to operate all of its activities in keeping with applicable environmental legislation and other requirements such as regulations, standards and best practices relating to its environmental aspects.

In addition, Williams Refrigeration is committed to exceeding legislative standards by introducing initiatives that will ensure that the company demonstrates full environmental awareness and responsibility.

Williams Refrigeration seeks to strengthen its position in the global market meeting worldwide agreements to cut energy, minimise waste, and optimise recycling opportunities. We will actively seek to prevent pollution and devise strategies to reduce overall our carbon footprint.

To achieve this the company has set specific environmental objectives and targets and introduced a programme of continual improvement to meet the requirements of the ISO 14001:2004 Environmental Management Systems.

All employees, and indeed, all those working on behalf of the company, will be encouraged to ensure the environmental impact of Williams Refrigeration is reduced to a practical minimum, at an acceptable cost, both to the company and to society, and this will be demonstrated in all aspects of the business.

Steve Bernard
Group Operations and Engineering Director
